#### **BLUE Coolant**

Sustainability | Energy Efficiency

Series		
MC MCi	MCH MCH-C	H F
С		
Control		
SIEMENS Powerline	SIEMENS Solutionline	

Via intelligent control of the high-pressure coolant pump, BLUE Coolant allows you to save energy in a sustainable manner for a significant reduction in operating costs – without any compromise.

### **Characteristics**

- \_ Control of high pressure pump with frequency converter
- Direct adjustment of the high pressure coolant pump's volume flow and hence the energy consumption to the machining task concerned
- \_ Motor and pump are retained

## **Benefits**

- \_ Up to approx. 70% energy savings depending on the machining process, compared to a system without frequency control
- \_ Process-adapted speed results in lower noise level
- \_ Longer service life of the high-pressure coolant pump
- \_ Reduction of long-term maintenance costs
- \_ Potential additional savings with use of coolant cooling

### Requirements

\_ Coolant unit (manufacturer KNOLL)
