Interface for extraction unit for emulsion

Sustainability | Safety at Work

Series

H | MCH | MCH-C | MC | MCi | F | C | HF

Control

FANUC | SIEMENS Powerline | SIEMENS Solutionline | uni-Pro 90 | SINUMERIK ONE

This upgrade provides the power supply for an emulsion mist exhaust system to your machine.

Characteristics

- Machine-side preparation on the work area cover, incl. electrical interface
- Power supply by machine with HAN6E plug-in connector (Harting)
- Interface in control cabinet
- Standard interface without exhaust system connections (D = 250)

Benefits

- More protection: reliable filtering of coolant mist and solid aerosols, no risk of explosion
- Safe work environment: operator reliably protected against hazardous gases

Requirements

- The extraction system is not included in the package price.
