Control

SIEMENS Powerline

More productivity, more performance – use this control upgrade package so that your machine tool and production processes reflect state-of-the-art technology. Current options can be retrofitted.

Characteristics

- _ Increased machine performance with Siemens PC card NCU 573.5

Benefits

- _ Current options retrofittable
- _ Latest hardware version: Spare part availability guaranteed
- _ More efficiency: more productivity, less non-productive time
- _ Faster processes: Reduction of program runtime by up to 10 % with at least 1 tool change per minute and pallet runtime max. 15–20 minutes [with 15–20 tool changes]

Requirements

- _ SIEMENS Powerline
