Control

uni-Pro 90 | SIEMENS Solutionline | SIEMENS Powerline

More productivity, more options, more convenient operation – use this upgrade package for the control system so that your machine tool and production processes reflect state-of-the art technology. Case-by-case review by operation department necessary.

Characteristics

- Software update in accordance with the HELLER-released standard software versions
- Software changes not made by HELLER are not considered and will be lost
- Special software versions also possible upon request, separate assessment based on effort
- SIEMENS 840D Powerline: Update to the maximum possible software version of the affected machine type and the version of the control hardware installed in the machine
- SIEMENS 840D Solutionline: Update to the maximum possible software version of the affected machine type and the version of the control hardware installed in the machine (NCU hardware version, GIV version)

Benefits

- More performance: make full use of all new functions and options offered by the control
- More convenience: practical and labour-saving innovations in operation

Requirements

- Update capability of the machine's current hardware version (hardware costs may be incurred)
