The new HELLER motor spindle with integrated zero spindle for your existing machines. Rely on maximum performance at the heart of your HELLER MC 16/25 with the HELLER motor spindle.

Characteristics

- _ Improved cycle time – the HELLER motor spindle version max. speed 16,000 rpm reduces the run-up times by up to 25% compared to previous motor spindles
- _ Increased maximum speed – on the HELLER motor spindle version, 8,000 rpm to 10,000 rpm

Benefits

- _ HSU : HELLER motor spindle with integrated zero spindle in tried and proven HELLER quality
- _ Optimised run-up performance
- _ Increased maximum speed
- _ Tried and proven zero spindle technology – simple and fast spindle replacement by separation of mechanical and electrical systems
- _ Zero spindle identical to the current HELLER series machines, with an attractive price/performance ratio
- _ Long-term spare part availability
