SIEMENS Solutionline

SINUMERIK ONE

The provisioning of a operating mode selection allows the operator to select the required operating mode (e.g. Setup) and activate the suitable safeguard (z.B. approval key). The EKS electronic key system is especially suitable for achieving a convenient operating mode selection that satisfies all statutory provisions.

Characteristics

_ The upgrade packages comprise 10 EKS chips for each access level

Benefits

_ Access for using an operating mode selector switch is limited to certain groups of people

Requirements

_ HELLER EKS system
