Camera system for production

Productivity | Process Optimisation

Series

H | F | C | HF | MCH | MCH-C | MC | MCi | MCP-H | MCS

Control

SIEMENS Powerline | SIEMENS Solutionline | SINUMERIK ONE

Free view of your machining process - even when using cooling lubricant emulsions. Gain safety and time when retracting your workpieces. Thanks to state-of-the-art technology, the camera system offers flexible options and a completely new viewing angle.

Characteristics

_ Camera system: Full HD 1080p
_ Seal air-supported sealing system, problem-free use in splash water-prone environments
_ Rotating special glass pane for a permanently free field of vision
_ _H Gen4 Dome Camera

Benefits

_ Optimum view of the production process
_ Autonomous camera system, does not need to be integrated into the machine control system (not at H Gen 4)
_ Flexible positioning of camera and monitor
_ Reduced installation costs, simple installation
_ Ideally suited for use at trade fairs and presentations
_ Several camera systems in one machine possible (multi-camera and multi-monitor possible) (not at H Gen 4)

Requirements

_ H Gen4: Schubert Panel_sealing air supply with a superfine air filter for the UYAR camera
