

HELLER motor spindle for MC 26 [Kessler replacement]

Availability | Follow-up Components

Series

MC

Control

SIEMENS Powerline

The new HELLER motor spindle with integrated zero spindle for your existing machines. Rely on maximum performance at the heart of your HELLER MC 26 with the HELLER motor spindle.

Characteristics

- _ Robust motor spindle with zero spindle system
- _ Excellent process capability
- _ Same ramp-up times as with the previous Kessler motor spindle

Benefits

- _ HELLER motor spindle with integrated zero spindle in tried and proven HELLER quality
- _ Tried, and proven zero spindle technology – simple and fast spindle , replacement by separation of mechanical and electrical systems
- _ Zero spindle identical to the current HELLER series machines, with an attractive price/performance ratio
- _ Long-term spare part availability
- _ Spring-loaded tandem-O-bearing arrangement instead of rigid single-O-bearing arrangement
- _ High-performance hybrid bearings with outer ring lubricationAll wear parts (including tool clamping) in the zero spindle
- _ Including leakage monitoring of the spindle
