SIEMENS Solutionline

The new HELLER motor spindle with integrated zero spindle (HSU: HELLER Spindle Unit) for your existing machines. Rely on maximum performance at the heart of your HELLER HF 3500 / 5500 Generation 1 with the HELLER motor spindle.

## Benefits

- HELLER motor spindle with integrated zero spindle in tried and proven HELLER quality
- Optimised run-up performance
- Tried and proven zero spindle technology – simple and fast spindle replacement by separation of mechanical and electrical systems
- Zero spindle identical to the current HELLER series machines, with an attractive price/performance ratio
- Long-term spare part availability

## Requirements

- Machine without the option HELLER facing slide unit
- _ no DC 100 machines
