Extraction unit for emulsion

Sustainability | Safety at Work

Series

MCi | MCH | H | HF | F | C

Control

FANUC | SIEMENS Powerline | SIEMENS Solutionline | uni-Pro 90 | SINUMERIK ONE

With this retrofit, you can equip your HELLER machines with an extraction unit for emulsion.

Characteristics

_ extraction unit with pipingattachment kit

_ mechanical filter elementsfilter system is appropriate when using water-soluble cooling lubricants

Benefits

_ More protection: reliable filtering of coolant mist and solid aerosols, no risk of explosion

_ Safe work environment: operator reliably protected against hazardous gases

Requirements

_ The standard interface is not included in the package price.

_ Dry machining, MMS machining or oil machining requires a different process-specific exhauster unit.
