Condition Plus [Global] includes additional assembly-related views in the HELLER Services Interface to support the analysis of maintenance-relevant data (e.g. chronological sequences of the wear states of the axes). Data analysis services are provisioned online, and also include the creation of quarterly reports by the HELLER specialist.

Characteristics

- _ Run time product

Benefits

- _ Online support for data analysis based on Axes Condition [AC] and/or Spindle Condition [SC]
- _ Quarterly reporting including manufacturer know-how and expert knowledge
- _ Additional assembly-related views in the HELLER Services Interface [Global]
- _ Recording and evaluation of condition-relevant data

Requirements

- _ Depending on the existing machine configuration, the HELLER4Industry functionality HELLER Services Interface Global with Remote Diagnostics, if necessary with HELLER CONNECT BOX, as well as the Axes Condition and/or Spindle Condition functionalities are required for the Condition Plus Global option. The technical requirements and contractual conditions are set out in the "Terms and Conditions HELLER4Industry".
